### TRUST YOUR BUTCHER

We slice to order, layer with intention, and keep the fat where it belongs. Flavor first. No trimming it back to behave.

Fatback comes from Charlie McKenna, built on the belief that good food doesn't need explaining. Just better ingredients and a sharp knife.

Behind the counter, Fatback Market stocks the cheeses, cured meats, and provisions that show up on your table. The good stuff. Chosen because it tastes better.

Green Butcher rounds it out - seasonal salads, vegetables, and lighter builds for when not everyone wants sandwich weight.
